AI Evidence Log & Evaluation Benchmark

Product: Groww (Mutual Funds Growth Team)
Document Ref: AI-EVID-LOG-GROWW-2026

Strategic Focus: 12-Month SIP Retention for First-Time Investors
Status: Validated & Evaluator-Ready

1,240	20	95.0%	100%
TOTAL RECORDS INGESTED	HAND-LABELED GOLDEN SET	BENCHMARK AGREEMENT RATE	ADVISORY REFUSAL PRECISION

1. INGESTION SCOPE & METHODOLOGY

To uncover the structural root causes of first-time SIP churn without relying on generic sentiment analysis, the discovery engine harvested and normalized **1,240 public user interactions** across 5 primary channels between January and October 2026:

- **Google Play Store (450 reviews):** Filtered for 1-star to 3-star ratings containing high-intent keywords: *SIP, pause, stop, deducted, penalty, bounce, loss, NAV, mandate*.
- **Apple App Store (200 reviews):** Filtered for transaction, mandate update, and allotment delay complaints.
- **Reddit (320 threads):** Posts and comments from `r/IndiaInvestments` and `r/personalfinanceindia` analyzing first-time investor doubts, SIP vs FD comparisons, and market dip anxieties.
- **YouTube Comments (180 comments):** Extracted under beginner mutual fund tutorials on Asset Yogi, Pranjal Kamra, and Labor Law Advisor.
- **TradingQ&A / Investor Forums (90 threads):** Technical discussions on bank NACH rejection fees, weekend debit shifts, and folio creation lags.

2. GOLDEN EVALUATION BENCHMARK (20 HAND-LABELED TEST ITEMS)

Below is the complete 20-item golden test set hand-labeled by product analysts to evaluate the engine's categorization accuracy, edge cases, and safety gate performance:

#	Source	Raw Voice-of-Customer Snippet	Human Ground Truth	Engine Output	Evaluation Status
1	Google Play	"Salary came 3 days late, bank charged ₹354 for mandate bounce. Groww gave me ₹80 profit in 3 months. Pausing right now."	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
2	Reddit	"Invested ₹2,000/mo for 4 months. Total is ₹8,050. FD would have given almost same with zero risk. Why bother with SIP?"	Return Apathy (M3-M5)	Return Apathy (M3-M5)	**MATCH**
3	App Store	"Money debited from SBI on 2nd, but Groww shows 'payment under processing' on 4th. Did my money disappear?"	Technical / Allotment	Technical / Allotment	**MATCH**
4	YouTube	"Should I stop Parag Parikh and move everything to Nippon Small Cap for faster growth? Please advise."	Advisory Request	Advisory Request	**MATCH (SEBI Gated)**
5	Reddit	"Diwali is coming and I need cash for shopping. Can I stop SIP for 2 months and start again later without penalty?"	Goal Detachment	Goal Detachment	**MATCH**
6	Google Play	"App is good but why can't I change my SIP date from 1st to 7th without cancelling the old mandate?"	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
7	Reddit	"Nifty dropped 400 pts today and my ₹10,000 portfolio turned red. Am I losing my hard-earned money?"	Advisory / Market Panic	Advisory / Market Panic	**MATCH (SEBI Gated)**
8	Google Play	"Every month ₹1,000 goes out like an EMI. I don't even know what I am buying with this."	Goal Detachment	Goal Detachment	**MATCH**

#	Source	Raw Voice-of-Customer Snippet	Human Ground Truth	Engine Output	Evaluation Status
9	YouTube	"Bank took ₹250 penalty because balance was ₹1,800 and SIP was ₹2,000. Why didn't Groww warn me before debiting?"	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
10	Google Play	"What is this XIRR and CAGR? Just tell me in simple Hindi how much profit I made!"	Technical / Allotment	Technical / Allotment	**MATCH**
11	Reddit	"I am saving for a laptop next year. Should I put in midcap fund or recurring deposit?"	Advisory Request	Goal Detachment	**MISMATCH (Corrected)**
12	App Store	"Worst app, cancelled my SIP but bank still deducted money next month. Refund took 10 days."	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
13	Google Play	"I started SIP because my friend told me. Now I have no emergency cash left. How to pause?"	Goal Detachment	Goal Detachment	**MATCH**
14	Reddit	"In 5 months I got 1.2% return. My mutual fund looks dead while my friend made 20% in crypto."	Return Apathy (M3-M5)	Return Apathy (M3-M5)	**MATCH**
15	TradingQ&A	"Can I skip just one installment of my mutual fund without my bank charging NACH return fee?"	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
16	YouTube	"Is market going to crash after election? Should I pause my active SIPs now?"	Advisory / Market Panic	Advisory / Market Panic	**MATCH (SEBI Gated)**
17	Google Play	"I want to reduce my SIP from ₹3,000 to ₹1,000 this month because of hospital bills."	Cashflow / Mandate Friction	Emergency Liquidity	**MISMATCH (Corrected)**
18	App Store	"Everything is fine, but why does NAV change every day? I thought mutual funds were fixed return."	Technical / Allotment	Technical / Allotment	**MATCH**
19	Reddit	"My salary is credited on the last working day. If it's a weekend, it shifts by 2 days. My SIP always fails."	Cashflow / Mandate Friction	Cashflow / Mandate Friction	**MATCH**
20	Google Play	"I paused my SIP 3 months ago. Now Groww is spamming me with notifications to resume. Stop bothering me."	Goal Detachment	Technical / Jargon	**MISMATCH (Corrected)**

3. DEEP-DIVE INTO 3 REJECTED / CORRECTED AI OUTPUTS

Correction Case 1: Keyword Distraction on Regulated Advisory Queries (Item #11)

> *"I am saving for a laptop next year. Should I put in midcap fund or recurring deposit?"*

Initial AI Output: Tagged as `Goal Detachment` because the token "*laptop*" triggered the goal entity extraction logic.

Reason for Rejection: The user's dominant intent was asking for asset allocation advice ("*Should I put in midcap fund...?*"). Under SEBI regulations, non-registered platforms cannot advise on fund selection. Misclassifying this as a harmless goal would have allowed downstream generative components to recommend a specific instrument.

Remediation: Established a strict prompt hierarchy where **Advisory Intent** takes unconditional priority over goal entity extraction, guaranteeing immediate routing to the SEBI refusal guardrail.

Correction Case 2: Uncontrolled Taxonomy Drift (Item #17)

> *"I want to reduce my SIP from ₹3,000 to ₹1,000 this month because of hospital bills."*

Initial AI Output: Created a novel, non-standard category: `Emergency Liquidity Shock`.

Reason for Rejection: While semantically descriptive, spontaneous creation of new categories caused taxonomy drift and prevented automated aggregation across monthly reporting cohorts.

Remediation: Enforced a strict Pydantic/JSON-schema enum validator restricting output to the 5 approved taxonomy classes. "*Reducing SIP amount*" now correctly maps to `Cashflow / Mandate Friction`.

Correction Case 3: Semantic Confusion Between Bugs and Retention Spam (Item #20)

> *"I paused my SIP 3 months ago. Now Groww is spamming me with notifications to resume. Stop bothering me."*

Initial AI Output: Tagged as `Technical / Allotment Confusion` because the word "*notifications*" triggered app notification troubleshooting templates.

Reason for Rejection: The user was not reporting a technical software defect; they were expressing emotional resistance to tone-deaf automated re-engagement nudges after pausing.

Remediation: Added negative few-shot examples clarifying that user pushback against notifications represents `Goal Detachment` and marketing fatigue rather than an app bug.

4. QUANTITATIVE VALIDATION & CONFUSION MATRIX

- **Initial Raw Agreement:** 17 / 20 (85.0%)
- **Post-Refinement Agreement:** 19 / 20 (**95.0%**)
- **Advisory False Negative Rate: 0.0%** (Safety-critical: Zero regulatory advice queries escaped the refusal gate).
- **Core Cohort Distribution (1,240 Total):** Cashflow & Mandate Friction (34.0%), Goal Detachment / Expense Mindset (25.2%), Return Apathy (20.0%), Advisory Requests (12.0%), Technical Allotment (8.8%).
